## LASERNET CONNECTOR

There is increased demand from the SME market for sophisticated output management functionality. Formpipe's Microsoft Dynamics NAV connector for its leading enterprise input/output management solution, is designed to offer SMEs using Microsoft's NAV ERP system the same output management functionality enjoyed by many large organisations globally using Microsoft Dynamics 365. The new connector will save your company time and slash costs.

## ADDING VALUE TO YOUR INVESTMENT

Working seamlessly with your investment in Navision, Lasernet allows you to deliver all your customers requirements for documents whilst at the same time ensuring you keep to your brand standards. Removing the complications of SSRS or visual studio and moving to a simple to use drag and drop solution will ensure you can move quickly with market trends or customer specific requirements. Coupled with this being able to view a document that was sent to the customer directly from Navision and sending a copy will save time money and resources and allow you to ensure you offer great customer service.

" As a member of Microsoft's TAP scheme we were able to develop the market leading connector for the latest version of Dynamics 365. As a company we weren't content to stop there. Recognising that smaller organisations experience the same output management frustrations using standard functionality as larger businesses do meant we have been able to bring a much needed product to market. As a result we're now able to give SMBs access to the same simple-to-use tool that are already making real difference to the bottom lines of big businesses the world over."

Mike Rogers, Formpipe Lاسernet,  
Commercial Director

## BENEFITS & FEATURES

Once implemented, the Lاسernet connector for Microsoft Dynamics NAV will offer enhanced functionality for setting up, designing the distributing business documents across numerous electronic and paper-bases formats.

### IN CONTROL

The connector gives you the ability to control network, printer & mail server connections.

### DOCUMENT FORMAT

Set up documents, quickly and easily in a range of formats to suit your needs from XML, PDF and CSV.

## DOCUMENT DESIGN

Easily design forms including Purchase Orders & Invoices with our drag and drop functionality.

## DISTRIBUTE DOCUMENTS

Distribution is made easy and the connector allows you to send to a wide variety of external systems from FTP, Email, Web services and SharePoint.

## RECEIVE

You can receive various types of documents, including scanned invoices.
