

**SIMPLIFY.  
SYSTEMISE.  
ECONOMISE.**

DRIVEN BY EXCELLENCE, DELIVERED IN PARTNERSHIP.

## WHY LASERNET?

Research shows that a business or an organisation can save 1-2%\* of its turnover by replacing paper invoices with digital ones and optimising the related processes.

Considering today's information flow, the need for better control, overview and document management increases simultaneously with the pressure on organisations to reduce costs. Automatisations within the organisation's value chain seem like an obvious place to start.

The automating and electronic exchange of messages along the procurement and financial supply chain become catalysts for optimisation of processes in the organisation:

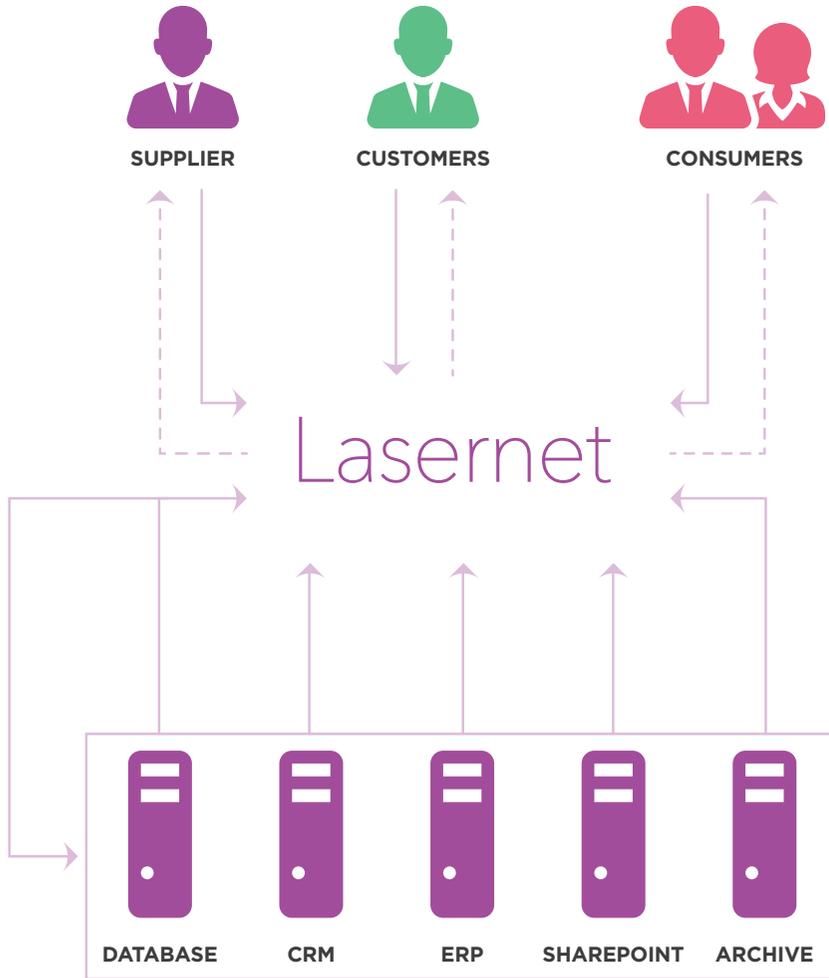

- Save time and money by eliminating programming
- Fast to implement and easy to use
- Increase business efficiencies
- Free your resources for more and other business critical tasks

According to market research conducted by Billentis\* e-invoicing is becoming a mandatory requirement for future business relationships, and public sectors across Europe are great examples on that; they have been pioneering and driving forces behind the digitalisation wave. Many countries have already declared e-invoicing as mandatory in business communication between private and public sectors.

With an intelligent and agile document management solution like Lasernet, your organisation will be able to meet the demands and requirements of your customers and business partners in relation to delivering and receiving business documents in multiple electronic formats. That is why!

***“Our search for more flexibility brought us to Lasetnet, and this is now our preferred output management solution”***

Noud Vekeens, Senior Software Engineer, Vanderlande

# THE LASERNET PLATFORM IS...

A state of the art input and output document management solution for small, medium and enterprise business applications

With the Lasernet software solution you are able to streamline, simplify and optimise all your business communications with customers and company stakeholders. Lasetnet is used for designing, converting and distributing incoming and outgoing business documents in multiple electronic formats. Today, Lasetnet is used by more than 2,500 companies in various industries across ERP platforms worldwide.

Lasetnet delivers data directly into your internal IT system, eliminating the need for manual input and securing a seamless flow of all your business documents. The agile architecture of the Lasetnet suite is developed to be deployed in modules, with each module adding significant benefits and options to the system solution.

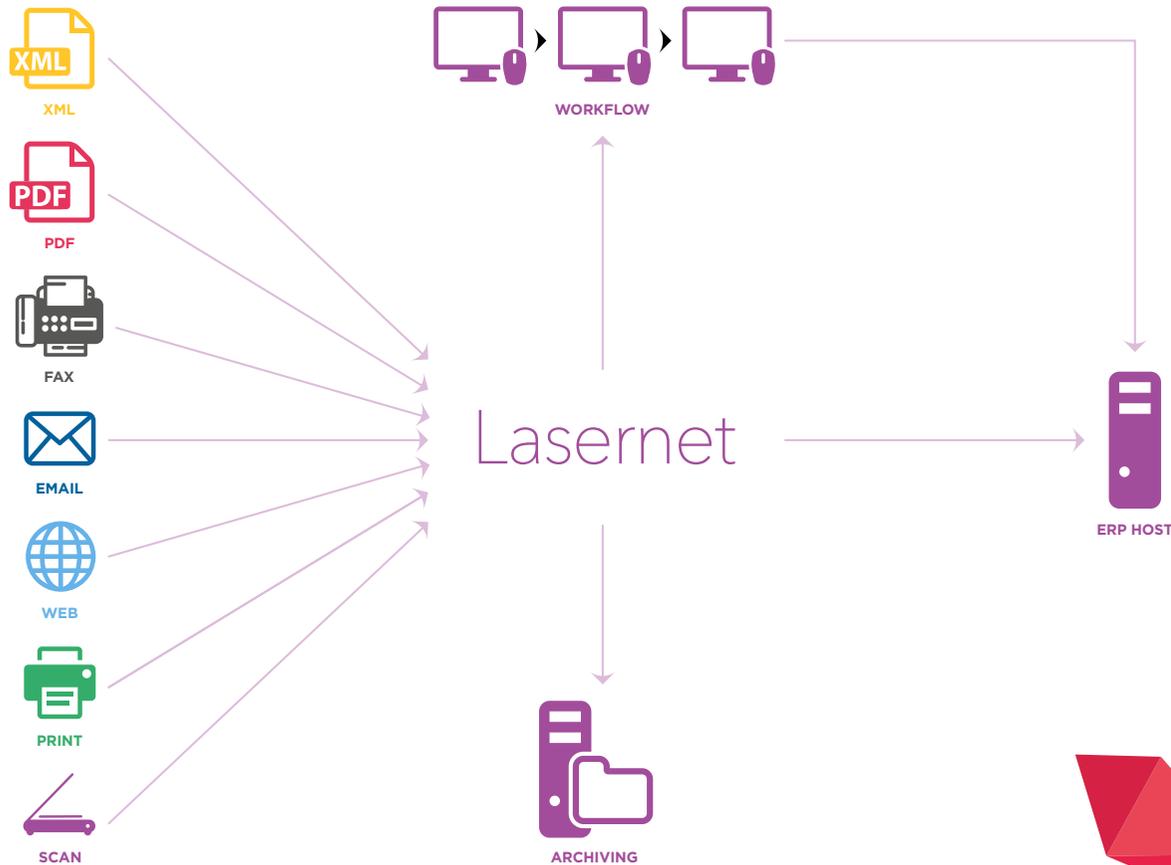

Lasetnet is a Microsoft certified solution developed to fit companies and organisations of all sizes. With Lasetnet you are able to create and execute an optimal input and output management strategy meeting the demands and requirements of your customers and business partners. The results speak for themselves: savings and reduced costs, more accessible documents and information, better decision making and ultimately increased competitiveness for your business!

## THE LASERNET ADVANTAGES:

- Ease of use – you are able to use Lasetnet from day one! Tasks like document creation can be performed by non-IT personnel thanks to Lasetnet's intuitive user interface
- Range leader – at Formpipe we have the broadest product range within the document management field. We are continuously expanding and developing new solutions to meet future demands of your business
- Global and local support – with more than 60 implementation partners across the world, customers can resolve any queries in moments without waiting for a help desk response from another time-zone

# INPUT MANAGEMENT

## YOUR BENEFITS ARE:

- Optimise workflow and automate processes
- Electronic and automated invoice processes can result in savings of 60-80% compared to traditional paper-based processing
- Be compatible with any source or destination
- Easily archive and retrieve your business documents

\*E-Invoicing / E-Billing, Billentis, 18/05/2017 in mid-size European company. Source: Billentis 032011.

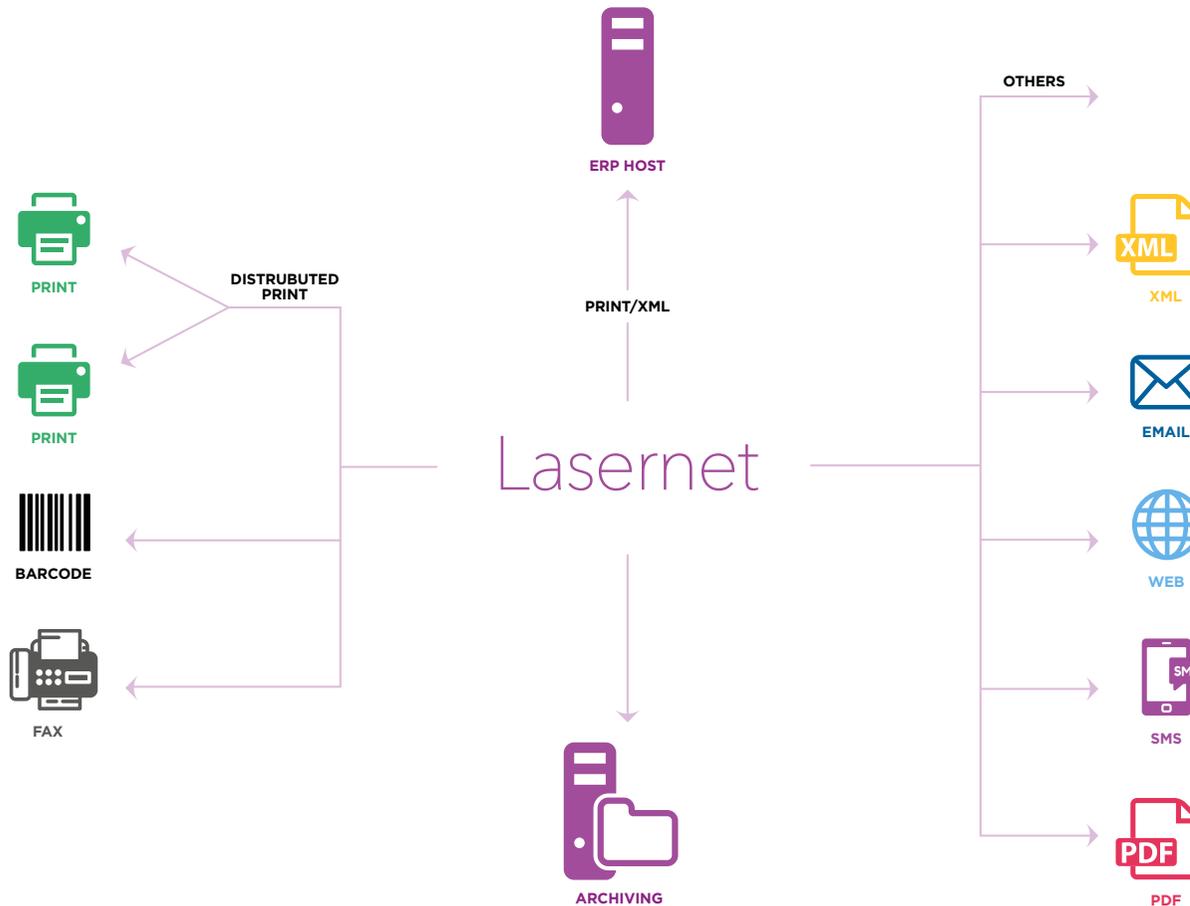

## IN SHORT...

**Input Management** is the capturing, structuring and archiving of all sorts of documents, both paper based and electronic; contracts, invoices, customer letters, offers etc.

Lasernet Input Management is a document handling solution that enables you to

receive business documents from external environments in various formats such as paper documents, faxes and electronic formats. It automates the conversion of all your business documents into action-enabled and process-ready information, importing it into your ERP system, document archives and workflows.

# OUTPUT MANAGEMENT

## YOUR BENEFITS ARE:

- Electronic and automated invoice processes can result in savings of 60-80% compared to traditional paper-based processing\*
- Adapt to your customers' needs and requirements and deliver documents in precisely the format and layout your customers require
- Automatically distribute high volumes of documents – deliveries across multiple channels including email, fax, XML and the web, in addition to network printers

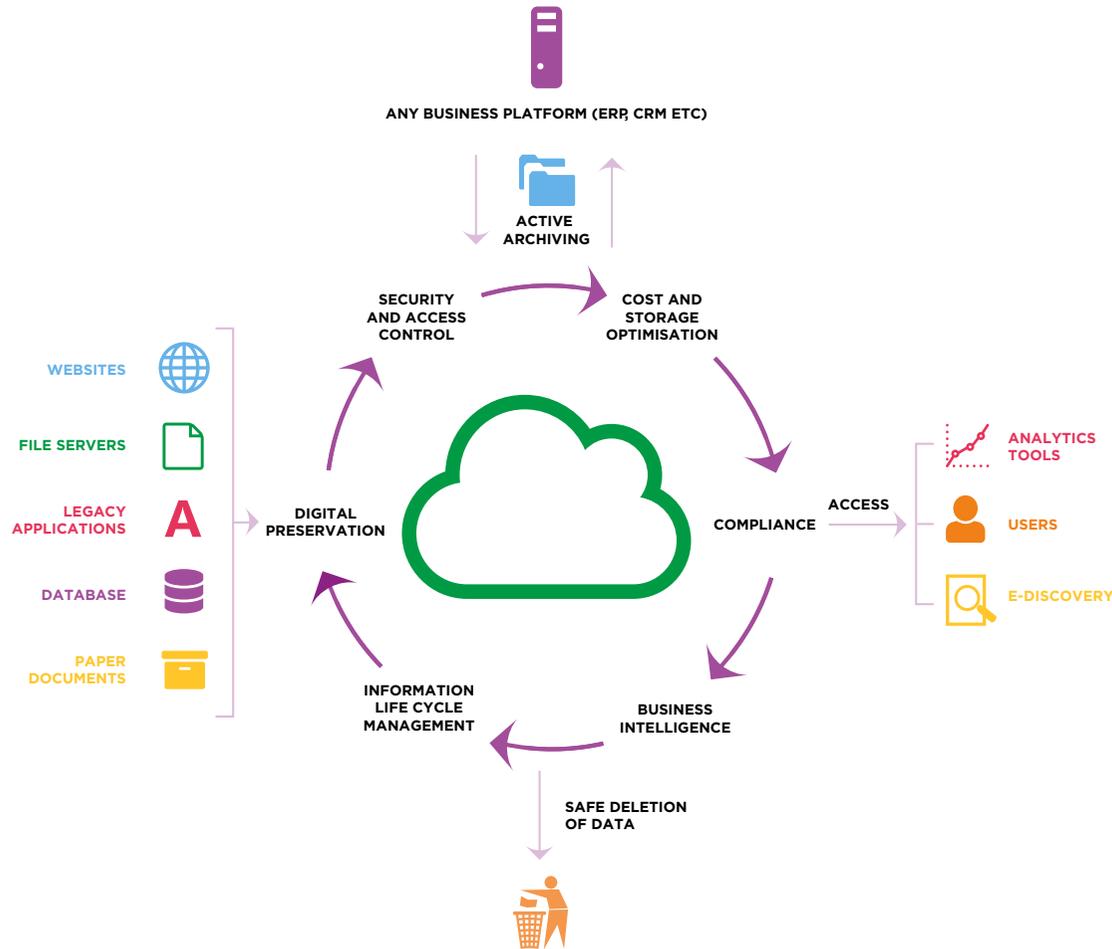

\*E-Invoicing / E-Billing, Billentis, 18/05/2017

## IN SHORT...

**Output Management** is the practice that deals with designing, formatting and distributing business documents created by business applications like ERP systems. Liveness Output Management offers the ability to easily meet the varying customer demands regarding business documents. The solution enables you to deliver, distribute and archive business documents in

any format (e-mail, fax, PDF, PDF/A, EDI, XML) and desired layout, as required by each individual customer, in an intelligent and structured manner. Liveness supports both EuroSox, Sarbanes Oxley, Basel II accounting rules, as well as plenty of local XML formatting regulations, thereby meeting all legal requirements.

# LONG-TERM ARCHIVE

## IN SHORT...

Given the massive volume increase of electronic records, storing digital content for decades so you can find, read and use it, whilst maintaining compliance, can be both costly and complex. Allow Long-Term Archive by Formpipe to simplify and future-proof this for you.

Long-Term Archive by Formpipe is a digital data preservation platform that follows best practice guidelines of the OAIS methodology and ISO 14721 to ensure organisations are storing human readable documents, objects and data for the long-term (50+ years).

Formpipe understand both the simple requirement of archiving documents away from day to day business systems to complex

## YOUR BENEFITS ARE:

### SAVE MONEY

Reduce the cost of maintaining legacy systems by migration to a preservation platform

### CONTROL ACCESS

A flexible permission matrix that matches your organisational needs

### EASILY ACCESSIBLE

Access archived records from within your existing systems

### LONG TERM PRESERVATION

Follow ISO and OAIS methodology built in to the product to ensure human readable in content in 50 years time

migrations of data and documents from legacy systems that are no longer needed within the business. Our team is experienced in adding value to long term data preservation projects by introducing methods that will ensure access security, reduce search and retrieval times and ultimately reduce significant costs to your organisation.

# ANY ERP

LTA and Lasernet support the ingestion from any ERP or CRM to ensure system efficiency and legacy system retirement. However, we have developed ERP specific solutions – connectors – for some of the most commonly used enterprise business applications to enable smart and simple archiving and retrieval.

## **System Retirement Solution**

Move away from being held data hostage with old legacy systems and free up IT budget for more innovative projects.

System retirement reduces the cost of maintaining systems purely for access to records and lowers the risk of no access or single human knowledge enabled access.

## **Document Preservation**

Adopt ISO level best practice through inbuilt tools and functions within Long Term Archive and utilize pre-configured metadata structures to minimize your design project stage.

Formpipe also support a Minimum Effort Ingestion approach by using workflow and review/edit tools within the preservation platform.

## **Data Transformation**

Utilise the pre-ingest tools to enrich metadata poor records, objects and documents to create usable searches and archive structure.

Ensure human readable files are stored for the long term delivering compliance and business opportunity.

# FORMPIPE THE SAFE CHOICE

## **Invest in a solution that meets your needs today and tomorrow**

Formpipe leads the way in the development of input and output document management. Network distributed forms, Windows document design software, automated document e-mailing and archiving are all pioneering products developed by Formpipe. Furthermore, we have launched solutions capitalising on technologies such as XML and the latest advances in web document publishing and e-commerce. In other words, you can be assured that Formpipe will meet all your requirements today and tomorrow.

## **Solutions built with understanding**

Our partners are specialists; highly experienced in providing solutions using advanced software technology. The first thing that they will do is to listen to you and the challenges you meet in your business life. This will provide them and us with a deeper understanding of your business and in turn, we can show you how Lasernet has risen to similar challenges elsewhere. They will then present you with a Formpipe solution that may bring profit and effectiveness into your organisation from day one.

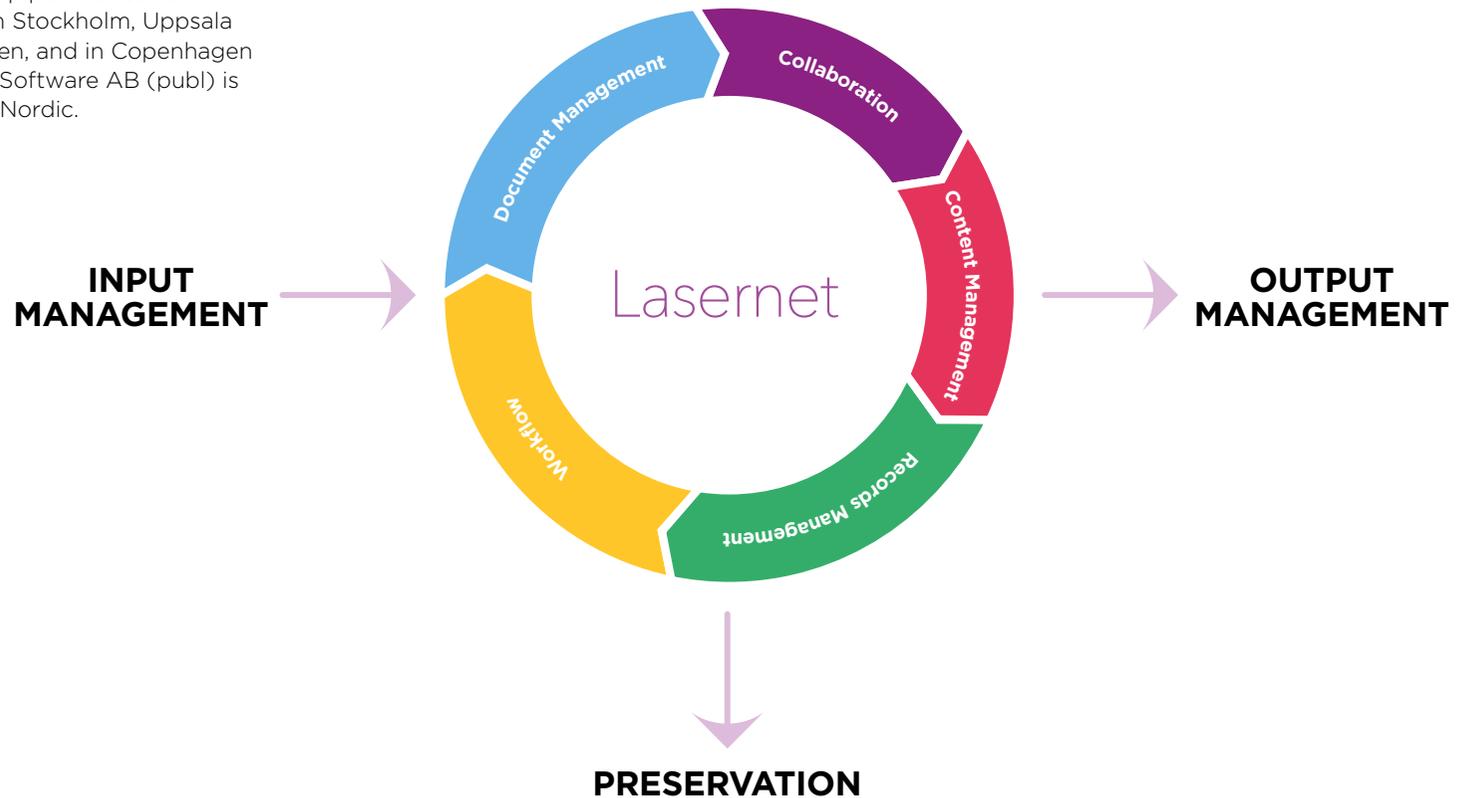

## **Global reach - local service**

Formpipe understands that company-wide input, output and document management solutions are best implemented and maintained at a local level. Therefore we have three development centers in Europe that are further supported by more than 60 implementation partners across the world. In this way, Formpipe ensures that you have someone close by who knows your systems and our software in considerable. This ensures you can resolve any queries in moments without waiting for a help desk response from another time-zone.

# ABOUT FORMPIPE

Formpipe is a software company in the field of Enterprise Content Management (ECM). We develop ECM products for structuring information and supply them to major companies, authorities and organisations. Our software helps organisations to capture, manage and distribute information, and to place it in context. Reduced costs, minimised risk exposure and structured information are all benefits that can be gained by using our ECM products. All our products enjoy strong market positions and are used by companies and authorities worldwide. Our products are distributed via highly experienced and certified partners. Formpipe was founded in 2004 and has offices in Stockholm, Uppsala and Linköping in Sweden, and in Copenhagen in Denmark. Formpipe Software AB (publ) is listed on Nasdaq OMX Nordic.
